MV317 DESCRIPTION:

The Multi-Purpose Facility is a fully self contained mobile living and office area. The unit is complete with two full bathroom facilities, with sink, toilet and shower. Five sleeping compartments are fitted with two beds and storage space. The unit also contains a full office or commons area with expandable slide out, refrigerator, storage space and sofa.

CAPACITY:

MV317 is capable of supporting a total of 10 persons.

POWER REQUIREMENTS:

Multi-Purpose Facility requires an electrical source. MV317 is configured to run from an external power source, consisting of a single 50 amp, 220 volt single phase electrical connection. Connection is made with a Hubbel 4-wire twist lock.

POTABLE WATER REQUIREMENTS:

MV317 is configured to feed from a standard 3/4" garden hose water source. An auxiliary 30 gallon potable water storage tank is supplied with the unit.

WASTE WATER REQUIREMENTS:

MV317 uses a standard RV type waste water connection. The single 3" connection has two valves controlling both black and gray water output. Two 100 gallon storage tanks are supplied with the unit to hold black and gray water separately.
